What we do

Opivider helps micro-influencers monetize their audience and build passive income. We hand them a high-quality digital product their followers already want — plus a complete, done-for-you plan and the exact guidance to sell it.

They keep up to 40% of revenue on every sale, with zero risk on their side. We only earn when they earn.

01

Get

A digital product your audience wants — plus the full sales plan.

02

Share

You present it to your audience, following our step-by-step guidance.

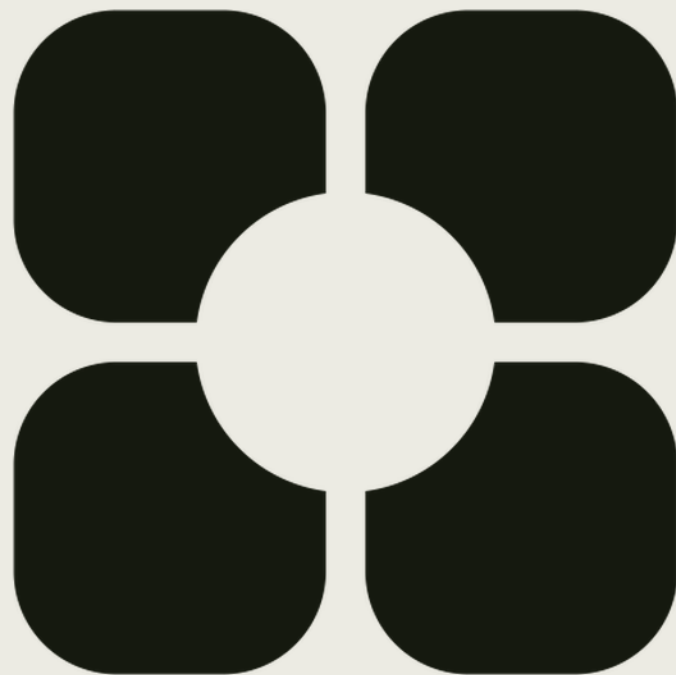

03

Earn

You keep up to 40% of revenue on every sale — with zero risk.

The symbol

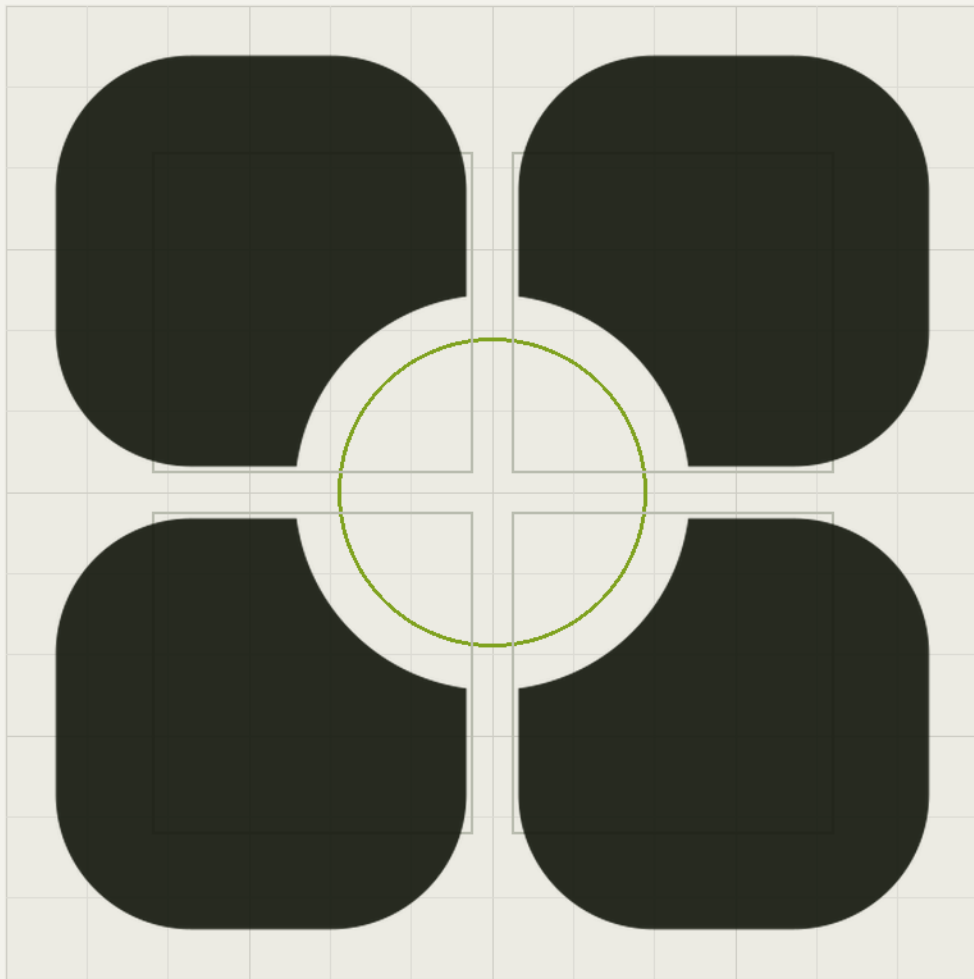

An aperture, built from four rounded modules meeting at a central hub — the O of Opivider.

The four pieces converging on one core express the connection at the heart of the model: Opivider, the influencer and the audience, meeting at the point where value changes hands. It is geometric, modular and instantly recognizable at any size.

The mark reverses to Volt on dark backgrounds.

Construction

- **Unit grid**

Built on a 120-unit square; align to a 10-unit baseline.

- **Modules**

Four identical rounded modules, one per quadrant.

- **Aperture**

A central circle (radius 19u) forms the open core — the O.

- **Radii**

Outer corners 13u; the inner edge is carved by the aperture.

Variations

Wordmark

Lockup — primary

REVERSED — ON DARK

Opivider.

Clear space & sizing

Minimum clear space = the height of the symbol (x)

MINIMUM SIZE

Lockup

120 px / 32 mm

Symbol

32 px / 10 mm

Never reproduce the logo smaller than these sizes. Below them the aperture closes up and legibility is lost.

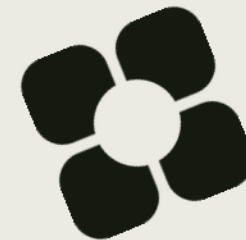

What not to do

Don't distort or stretch

Don't recolor off-palette

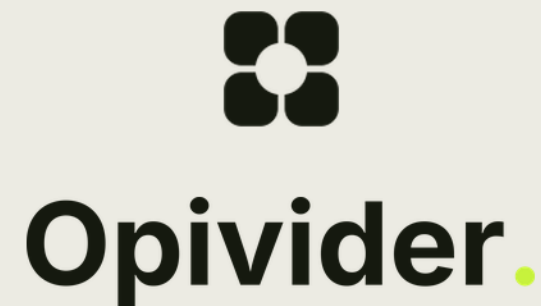

Don't rotate the mark

Don't add shadows or effects

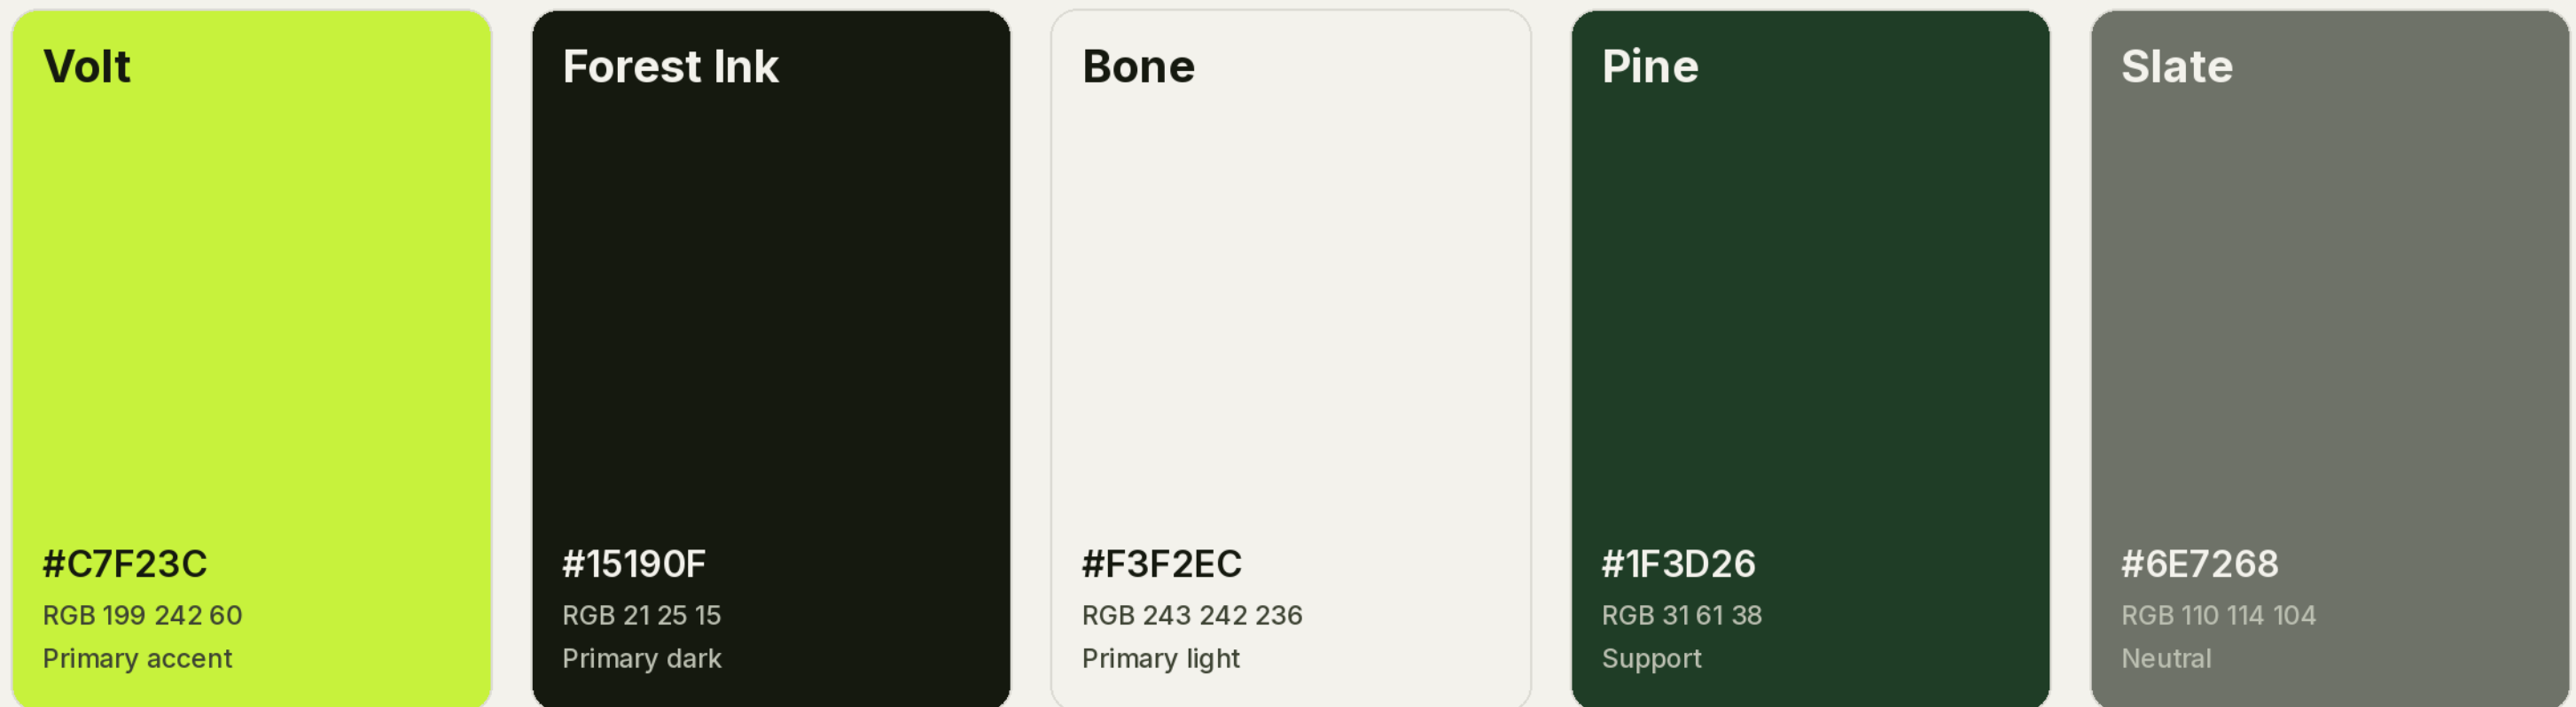

Don't place on low contrast

Don't rearrange the lockup

Color

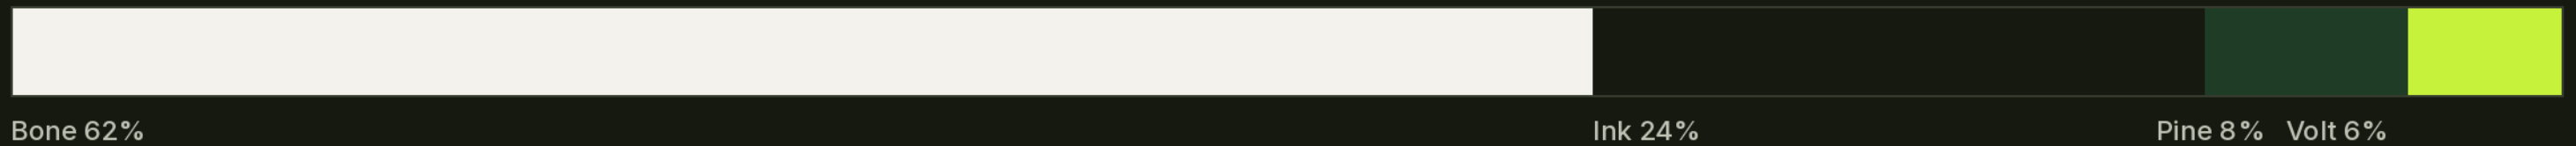

Two core neutrals (Ink + Bone), one hero accent (Volt), one support tone (Pine) and one utility neutral (Slate). Keep Volt to roughly one-tenth of any composition so it always reads as emphasis.

Color in use

PROPORTION

APPROVED TEXT PAIRINGS

Ink

on Bone

15.9:1 AAA

Bone

on Ink

15.9:1 AAA

Ink

on Volt

13.7:1 AAA

Rule

Volt is a fill and accent color only. Never set Volt as small text on Bone — it fails contrast (1.2:1).

Inter

Inter is our single typeface across every touchpoint — interface, print and social.

Opivider	Regular Body copy, long-form
Opivider	Medium UI labels, captions
Opivider	SemiBold Sub-headings, kickers
Opivider	Bold Headings, the wordmark
Opivider	ExtraBold Display, statements

Aperture pattern

ZERO RISK

40%

Big numbers carry the offer.

Voice

Plain-spoken

Short sentences. Real words. No corporate filler.

Confident

We state the benefit and stand behind it.

Benefit-led

Lead with what the influencer gets, not how it works.

Honest

"Up to" means up to. Zero risk means zero risk.

Typeface

Inter

Regular • Medium • SemiBold • Bold • ExtraBold
Single typeface, all touchpoints.

Golden rules

- Keep clear space ≥ the symbol height.
- Volt is an accent only — never small text on Bone.
- Don't distort, rotate or recolor the mark.
- Lockup is default; the symbol is for icons.
